

## **Review of C&D recycling policy and regulation**

Hon. Bill Marmion, Minister for Environment, has asked the Waste Authority to review WA's policy and regulatory framework for recycling construction and demolition waste and to compare them with those in states and territories throughout Australia.

An independent consultant has been engaged to report to the Waste Authority according to the following Scope of Works:

1. How construction and demolition waste, inert waste and clean fill is defined and categorised in each Australian jurisdiction
2. Permissible end uses for construction and demolition waste and products produced from this waste, including using the waste as fill for land development, in each Australian jurisdiction
3. How collection, processing and recycling of these materials is regulated in each Australian jurisdiction
4. Whether a landfill levy applies to construction and demolition waste used for land development in each Australian jurisdiction.

**Submissions closed on Wednesday 12 October.**
